ROOM 202
PHONE: 737-4100

Mr. Robert Westerman
State Board of Health
Dover, Delaware

Dear Mr. Westerman:

Confirming our conversation of Friday, January 17, 1969, at the Tybouts Landfill site, please send us an explanation and more detailed interpretation of Item 10, page 11, of the State Sanitary Code.

We are presently accepting the following industrial wastes: cardboard sheets, empty steel and cardboard drums, wood crates, boxes and pallets, plastics and plastic wastes, textile industry waste materials and wastes from light manufacturing of various materials. As far as we can determine, toxic or hazardous wastes have not been delivered and deposited at the landfill.

All bulky wastes, such as drums, pallets, boxes, televisions, refrigerators, etc., are crushed before incorporated in the fill. This is done without storage, as part of our continuous operation. We have experienced no difficulty incorporating materials of this type into the landfill.

As specified in Section 10, page 11 of the sanitary code, we request your permission to accept and incorporate these materials in the landfill.

The only materials presently stored are Christmas trees, and our intention is to rent a chopping machine and destroy the trees before they are put into the fill.

Your cooperation in this matter is appreciated.

G.W. Dutcher
Director of Public Works
